

Socius Workflow: Original vs Fixed Comparison

This document compares the original workflow with an improved, production-level workflow for better scalability, usability, and user engagement.

Area	Original Workflow	Improved Workflow
Feed System	Loads all approved posts	Personalized + Explore feed with ranking
Search	Communities only in full search	Posts + Communities unified search
Post System	Basic draft and approval	Voting, commenting, dynamic ranking
Moderation	Partial (posts only)	Full system with reports and actions
Notifications	Not implemented	Real-time notifications
Profile	Visual only	Editable and saved to database
Community Flow	Unclear approval	Admin approval system
Engagement	Minimal	High (votes, comments, feedback)
